DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Information Disclosure Statement

The listing of references in the specification (such as on page 1, line 24) is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents,

Art Unit: 3632

publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Objections

Claim 14 is objected to because of the following informalities: Claim 14, line 1, "A claim as claimed...." Should be corrected - - A clamp as claimed.... - - . Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 13-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation "...composed of a material which is thinner than the material of which..." in claim 6, line 2 is generally vague and indefinite as it is not clear as to thinner in what respect (i.e. viscosity, dimension, etc.). Regarding claim 13, it is not clear whether the "a first aperture" recited in line 2 is the same "a first aperture" recited in claim 1, line 6. If so examiner suggest claim 13 to recite "said first aperture".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 8-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Rubik (US patent no. 5,042,118). Rubik discloses a clamp comprising all the claimed features of applicant's invention as illustrated below. In addition, Rubik discloses first aperture and second aperture collinear with the first aperture (not labeled or shown in detail but discussed aligned hole in walls 14 and 24, col. 5, lines 46-51).

Claims 1-3, 7-10, 13-16, are 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Welch (US patent no. 3,368,782). Welch discloses a clamp comprising all the claimed features of applicant's invention as illustrated below where in first and second jaws are asymmetrically nested within each other.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art demonstrate various slide jaw clamps of general interest.
